Terre Haute, IN 47802

Heavy Duty Vehicle Network Adapter

Release date: November 1, 2011

November 1, 2011, Terre Haute, IN – Simma Software, Inc. announced today that they are introducing a new low cost high-performance J1939/J1708 wireless adapter supporting the industry standard wireless 802.11b networking specification. The new wireless adapter, VNA-WiFi, supports the heavy-duty and commercial vehicle markets.

The VNA-WiFi allows OEMs, fleets, and service providers, for heavy duty and commercial vehicles, to wirelessly connect in real-time to their vehicle networks, allowing them to instantly gather critical information such as active diagnostic faults and fuel economy metrics.

The VNA-WiFi, and all VNA family devices, also supports ISO 15765 and CANopen, allowing the VNA to support light-duty vehicles and industrial automation applications. To learn more, see our [Wireless J1939 to WiFi Adapter](#) page. We also provide low-cost J1939 to RS-232 and J1939 to USB adapters.

"With the 802.11b interface, PDAs such as an iPhone, iPod, Droid, become a gateway for technicians and drivers to diagnose and interact with their vehicles. The industry loves our new VNA product line, its low price point, and reliability." said JR Simma, the President of Simma Software.
