Simma Software Joins STMicroelectronics Partner Program to Accelerate Customer Time-to-Market

Press release date: May 15, 2018

May 15, 2018, Terre Haute, IN – Simma Software, Inc. announces that it has joined the STMicroelectronics Partner Program to make its CAN software solutions available to customers all over the globe.

According to JR Simma, founder of Simma Software and current Director of Engineering, “We have been working with OEMs and Tier 1 suppliers that are using STMicroelectronics microcontrollers for over 10 years. Being added to the STMicroelectronics Partner Program is the culmination of many years of engineering experience and product development around the various families of ST microcontrollers.” Simma Software supports all the ST microcontrollers including the STM8, STM32, and SPC5 families. More information can be found at the Simma Software website on the [products](#) page.

“The new ST Partner Program helps customers’ design teams access extra skills and resources to aid engineering development and shorten time-to-market for new products,” said Alessandro Maloberti, Partner Ecosystem Director, STMicroelectronics. “By selecting, qualifying, and certifying our program partners, we are taking yet another major step in helping customers accelerate design and development, and ship to market the most robust and efficient products and services.”

STMicroelectronics, a global semiconductor leader serving customers across the spectrum of electronics applications created the ST Partner Program to speed customer development efforts by identifying and highlighting to them companies with complementary products and services. Moreover, the program’s certification process assures that all partners are periodically vetted for quality and competence.
