XCP Bootloader

Press release date: February 2, 2015

February 2, 2015, Terre Haute, IN – Simma Software, Inc. announced today a new offering to their growing list of software solutions for OEM’s, fleets, and service providers in the heavy duty and commercial vehicle market. A new high-performance, XCP bootloader is now available.

According to JR Simma, Director of Engineering and Founder of the firm, “we have been delivering solutions for reprogramming ECUs for over a decade. Up until now, the bootloaders have accomplished the ECU re-flashing over CAN, J1939, or UDS. The delivery of this XCP bootloader to a Tier 1 automotive supplier is an important expansion to our bootloader suite of offerings.”

About Simma Software, Inc.

Simma Software, Inc. specializes in real-time embedded software and hardware for the automotive, military, and industrial automation industry.
